

POSSIBILITIES. TRANSFORMATION. RESTORATION.

✦ THE CHALLENGE

Research, focus groups, and testimonies of returning citizens have demonstrated that stable living arrangements and mentorship are crucial to successful reentry. Successful reentry programs rely on more than just helping ex-offenders find housing and jobs. It also requires helping offenders change their attitudes and beliefs about themselves, authority, crime, address mental health issues, provide mentoring, offer educational opportunities, and job preparedness.

✦ OUR MISSION

The mission of Nehemiah Village is to be a resource of possibilities and transformation for formerly-incarcerated men, helping to return and restore them to our communities. Using the tool of communal housing as our primary means of service, we will provide these returning citizens with:

- safe housing
- help in finding employment
- help with obtaining education and employable job skills
- spiritual guidance
- life-skills
- counseling
- mentoring
- opportunities to serve others
- meaningful community
- help with homeownership

“Then they said, “Let us start building!” So they committed themselves to the common good. **Nehemiah 2:18**

THE SOLUTION

Working alongside the investment of WSU, the city and federal government into the 67214 zip code, we wish to address the needs of returning persons to this area, so that this investment product is kept intact, and lives can be transformed.

Using the successful re-entry model of Working Men of Christ reentry ministry (recidivism rate of 5% over nine years), we offer stable housing (2 houses), faith-based, highly structured community, high accountability, practical support and employment help. Each house will house ten persons, and two administrators.

THE NEED

We are looking to partner with donors who can embrace the vision and see the need to support this vision of restoration. Our goal is to raise \$2M to begin construction in late spring-early summer 2022.
